

Shibanator

The Meme Coin That Drives Community, Utility, and Real-World Value

White Paper

Version 1.0

Launch Date: October 10, 2025

Author: Shibanator Community Team

Current Date: November 10, 2025

Executive Summary

Shibanator is a community-driven meme coin launched on the Movement Market iOS app, combining organic social growth, play-to-earn gaming, NFT utility, physical merchandise, and transparent passive rewards. With a fixed total supply of 1,200,000,000 tokens and no minting capabilities, Shibanator prioritises fairness, sustainability, and long-term engagement.

As of November 10th 2025

Current Market Cap: \$74.12k

Total Invested: \$9.01k

Holders: Rapidly approaching 1,000 (organic growth via TikTok, X, and social platforms)

Shibanator is not just another meme coin—it's a movement.

Built on Apple-vetted infrastructure, it eliminates rug-pull risks while delivering daily utility through games, merchandise, and real-world impact.

Holders earn 0.5–1% of every trade in passive fees, creating a self-sustaining economy.

This white paper outlines the project's foundation, phased roadmap, risk mitigations, and vision for becoming a household meme name by 2027.

Project Overview

Tokenomics

Metric	Details
Total Supply	1,200,000,000 (fixed, no minting)
Launch Platform	Movement Market (custodial, Apple-vetted iOS app)
Supply Distribution	100% in circulation at launch.
Max Holding Limit	No single account can hold more than 5% of supply (enforced on-platform)
Passive Rewards	0.5–1% of every trade distributed pro-rata to holders
Fee Structure	Low-friction trading with built-in holder incentives

Core Principles

1. **Transparency** – All transactions on Movement Market; supply locked at launch.
2. **Community Governance** – Roadmap subject to holder votes via in-app polls.
3. **Utility-First** – Games, NFTs, merchandise, and charity drive engagement.
4. **Sustainability** – No hype dumps; value accrues through real activity.

Risk Mitigation

Why Shibanotor Won't Fade

Risk	Traditional Meme Coin failure	Shibanator Fix
Rug Pull	Dev holds 20–50%	Apple-vetted, custodial no account can hold more than 5% supply
Dead Volume	No reason to trade after launch	Game + NFTs = daily trades

Risk	Traditional Meme Coin failure	Shibanator Fix
Hype Crash	No utility post-pump	Merchandise, silver coins, charity = real-world value
Centralisation	Dev controls supply/minting	100% fair launch, supply locked forever
Fading Community	No incentives to stay	Passive fees + play-to-earn + governance

Technology & Infrastructure

Platform: Movement Market (iOS-native, Apple-approved).
